THE MISHCOTT MYSTERY.

A Family Receives a Large Sum of Money and a Fine Watch from an Unknown.

Some mysterious person is playing the role of Santa Claus for a family at Mishcote, Wis. The gifts take the form of large sums of money, as much as \$14,000 having been received at one time, and watches, jewelry and other costly articles. In the early part of October of last year a stranger appeared in the village and inquired regarding the Hallberg family residing there, claiming to be a Mr. Harris and to represent a brother of the Hallbergs who had left his home about 30 years ago to seek his fortune in California, and of whom the family had never since heard. Before leaving the stranger promised to write from a good news. He was looked upon with suspicion, and no faith was placed in his promises.

Several weeks later, Jens Hallberg received a letter containing matters relating to the long lost brother and bits of family history only known to the family. Included was a check for \$14,000, which was to be equally divided among the sisters and brothers, giving each \$2,800. The check proved to be good and was cashed at the Manitowish Saver Bank.

The Hallbergs are respectable people and are well known in the community. They are as much mystified as all those who have looked into the matter and cannot account for the strange arrival of their brother, in case he is still among the living. This week the family received a gold watch studded with diamonds from "Mr. Harris."—Special in Chicago Inter Ocean.

Children Cry for Pitzer's Castoria.

Know When They Are Hungry. Iguons must have the credit of possessing some intelligence. A curious and very interesting sight may be seen each day, Sundays excepted, at one of the windows of the office of Henry W. Williams, in the Rialto building, opposite the postoffice. For the past few years some 30 or 40 pigeons have been there regularly fed at 11 o'clock. A bushel of cracked grain is purchased at a time for the purpose. The birds gather on the west side of the postoffice and watch for the window to open. They know perfectly well when that hour arrives. If there should chance to be any delay in opening the window, they will often fly over to the other windows of the same office and tap on the glass to remind the clerks who may be sitting there that it is time for their breakfast. The minute the window opens they land on and about the sill and push and crowd and stand on each other's backs and sometimes fight, so eager are they to pick up the grain which is spread all about the outside. They soon become quite tame and readily eat out of the hand.—Boston Transcript.

So He Ought.

Patient (regarding his lacerated face in the mirror). You surely are not going to charge me full price for that shave? Barber. Yes, sir. Why not? "I think you ought to give me cut rates!"—Boston Transcript.

Use SOZODONT when you have eaten; Use SOZODONT your breath to sweeten; Use SOZODONT to aid digestion; Use SOZODONT and ask no question. Preserve your molars and you won't regret the use of SOZODONT.

SUMMONS.

IN THE DISTRICT COURT OF THE State of Nevada, in and for Washoe County. The State of Nevada sends to John A. Garges greeting: You are hereby required to appear in an action in said court, brought by said State against you as defendant in said action, in and for the county of Washoe, and answer the complaint therein within ten days after the service on you of this summons (exclusive of the day of service, if served in said county, or twenty days if served out of said county, but within said district, and in all other cases forty days; or judgment by default will be taken against you according to the prayer of said complaint. This action is brought to recover a judgment and decree of said court dissolving the bonds of matrimony between you and the plaintiff on the grounds that on the 11th day of January, A. D. 1893, you willfully and without any cause, deserted and abandoned the plaintiff, and still continues, and has ever since continued, to desert and abandon the plaintiff, without sufficient cause or reason, and against her will and consent. Plaintiff alleging that you married the said plaintiff at Johnson County, Missouri, on the 15th day of January, A. D. 1891, and have ever since been husband and wife; that he is now and has been for one year last past the resident of Washoe County, Nevada; that there are three minor children of said matrimony, to-wit: marriage. Plaintiff also demands that the custody of said minor children be awarded to her, and that she recover her costs. All of which will appear more fully from the complaint, which is on file in the office of the Clerk of said court at Reno, in said county, and to which you are especially referred. And you are notified that if you fail to appear and answer said complaint the plaintiff will apply to the court for relief demanded.

In Witness whereof, I have hereunto set my hand and affixed the seal of said court at Reno, this 9th day of February, A. D. 1894.

Clerk of the District Court of the State of Nevada, in and for Washoe County.

STATE OF NEVADA,

County of Washoe, ss.

I, C. T. BENDER, Cashier of the above-named bank, do hereby certify that the above statement is true to the best of my knowledge and belief.

FACTS VS. THOUGHTS.

Another communication from Mr. R. L. Fulton on the financial question appears in the JOURNAL. The gentleman admits to-day what he denied yesterday, "that Congress is granted power by the Constitution to regulate the value of coins." But Mr. Fulton thinks this power of Congress is limited to "putting more or less metal in the coins, not by changing the value of the metal itself by statute."

The JOURNAL has no disposition whatever to question the gentleman's right to think as he pleases and advance such theories as he pleases, but it respectfully informs him that the Constitution says nothing whatever about the quantity or quality of the metal that shall be put in coins. It leaves that matter entirely to the discretion of Congress. As stated yesterday, Congress authorizes the coinage of less than two cents worth of nickel and copper, fixes its value, when coined, at five cents, and compels Mr. Fulton to accept it at that value. That the founders of the Republic, after months of study, gave Congress that right, may be displeasing to Mr. Fulton, but they did it nevertheless, and that they were right in doing so has been questioned only by Mr. Fulton.

The JOURNAL begs to assure Mr. Fulton that there is a place in the law that says 412½ grains of standard silver coined into a dollar, shall be a legal tender for a dollar. Of course the law does not say, though Mr. Fulton implies that somebody says it does, that he shall sell his horse or his hay, except when they are condemned for public use, for a given number of dollars, but if Mr. Fulton disposes of his horse or his hay, at a stated price, he must accept standard dollars, if such dollars should be tendered him, in payment of the debt.

Mr. Fulton should bear in mind the facts that the Constitution empowers Congress to coin money and regulate the value thereof, and leaves it wholly discretionary with Congress whether the coins shall be gold, silver, copper, nickel or any other substance, and, as shown in the case of the five cent piece, the value of the coin does not, as he seems to think, depend upon the material of which it is made.

The JOURNAL respectfully suggests that Mr. Fulton read the Constitution and disabuse his mind of the erroneous idea that it says Congress shall regulate the value of coins by putting more or less metal in them, or that it has ought to say about the ratio of gold and silver for coinage purposes.

HAWAIIAN AFFAIRS.

A report comes from Washington that there is some excitement at the capital over an order instructing Admiral Walker to take command of the naval forces at Hawaii. The order is said to be due to a well authenticated report that the Provisional Government of Hawaii is about to apply to some other power than the United States for annexation or a protectorate, and the wish of the President is to have an old and experienced officer in command at Hawaii should the rumor prove to be well founded. It is stated that the Admiral will carry orders to resist with all his force the attempt of any foreign power to annex the islands or establish a protectorate over them. The present government of Hawaii has been in existence since a year ago last January. Its authority at the present time is not disputed, except by the Queen and her sympathizers. The government desires to have the islands annexed to the United States, and it that is not satisfactory to have the United States establish a protectorate over them. There is a wide difference of opinion as to the advisability of annexing the islands, with all that annexation implies, as three-fourth of the inhabitants are natives and Chinese, or a mixture of both who will make undesirable citizens. There is no particular objection, however, to establishing a protectorate in the islands and that the United States, to be consistent, should not hesitate to do. Our government does not want to oblige the Hawaiian government by establishing a protectorate, for is it willing that any other government should do so even with the consent of the Hawaiian government. The "dog in the manger" policy is unworthy the government of the United States, and as it will virtually establish a protectorate by preventing other foreign nations from interfering it should do so in reality by act of Congress.

Three State officers of Michigan are under indictment for stealing. The Governor took possession of their respective offices and appointed three persons to perform the duties pertaining to them. The Governor of Michigan is a Republican and the indicted officers are also Republican. He acted as did the Governor of Colorado, only the officers removed in Michigan were elected and those removed in Colorado were appointed.

What is the "silver party of Nevada?" so interested in the Populists for that they urge contributions to the Populist campaign fund from five cents up?—Brains and brag.

For the very simple reason that the Populists are in favor of the free and unlimited coinage of silver.

At Massillon, Ohio, yesterday General Coxey of the commonwealth army received \$1,411 for his army. Robert C. Givens of Chicago sent him a check for \$1,000.

CONGRESSIONAL PROCEEDINGS.

The Omaha Mint—The House Filibustering.

WASHINGTON, March 23.—In the Senate Sherman introduced a resolution directing the Judiciary Committee to examine and report whether the simulation of coins of the United States by coins of the same weight and alloy in fineness, except as authorized by law, is made criminal by acts against the counterfeiting of coins of the United States and other countries, and, if not, to report a bill to prevent and punish such simulations.

This resolution gave rise to much raillery, and Senator Cullom of Illinois said: "If they cannot get free coinage in one way they will in another."

Mr. Manderson of Nebraska did not believe it was possible that the existing laws were not sufficient to reach the class of counterfeiters mentioned, but if it was true he thought the defect should be remedied.

Mr. Stewart of Nevada objected to the present consideration of the resolution and it went over without action.

The House spent the day filibustering over a contested election case.

Sayer presented a joint resolution for the appropriation of \$10,000 for salaries and additional deputy collectors of internal revenue to carry out the provisions of the Chinese Exclusion Act, as amended last December. Agreed to.

COXEY'S ARMY.

The Matter Looked on in Washington as Serious.

WASHINGTON, March 23.—People who have heretofore smiled derisively when the subject of Coxey's army was mentioned now begin to think that there is a strong prospect of it becoming a solid reality after all, and that will see this great mass of unemployed laborers from all sections of the country gathered in front of the nation's Capitol giving the strongest object lesson ever presented to the legislators of the United States. The development of the past few days shows that the leaders of this movement are terribly in earnest, and unless something unforeseen should occur to prevent it General Coxey will on Sunday morning sound the advance and inaugurate this novel pilgrimage.

Part of the army may be quartered at the place known as Chevy Chase. It is owned by a California syndicate that have spent millions of dollars in building roads and streets and otherwise improving it. It is doubtful if the owners and residents of this fashionable suburb would yield very willing consent to have their quiet, clean little town desecrated by the presence of so many unemployed and perhaps unwashed sons of toil.

Some Congressmen are inclined to take the matter seriously. One of these is Senator Kyle, the Populist Senator from South Dakota. Kyle is Chairman of the Committee on Education and Labor.

MARINE REVENUE SERVICE.

Urging Measures to Promote Its Efficiency.

WASHINGTON, March 23.—Ransom, Chairman of the Senate Committee on Commerce, has received from Secretary Carlisle a letter containing his views of the pending bill "to promote the efficiency of the revenue cutter service." The Secretary quotes from the annual reports of several of his predecessors to show the necessity for a provision of law creating a retired list of officers of the revenue marine service. The statutes provide that each revenue vessel shall have one Captain and a stated number of other officers, but no provision is made for filling places made practically vacant by reason of old age or other physical infirmities. That is, no appointment can be made until there is an actual vacancy. The Secretary shows that the "waiting orders" list contains nearly one-third of all the Captains in the service, their ages ranging from 54 to 90 years. The Secretary says the need of more officers on the active list is urgent, and recommends that a retired list be authorized, and places left vacant shall be filled by promotion, as now.

NOT GOVERNOR WAITE.

The Governor of Indiana Proposes to Attack the Industrial Army With State Troops.

INDIANAPOLIS, March 23.—There will be a bloody battle if the Northwestern division of General Coxey's army attempts to cross the Indiana State line. Governor Matthews announced to-day that the army shall never invade this State and that he will call out the State militia to prevent it. If by a detour the army should dodge the military companies and enter Indiana territory railway trains will be pressed into service at once and the army overtaken, and the militia will be instructed to fall on the footsore marchers and drive them back.

Telegraphic Notes.

Senator Colquitt is dying. The great storm in the east has entirely abated and the sun is once more shining brightly.

An order was yesterday granted staying the execution of assassin Frensdagst until April 6th.

A fire broke out in the Champa six story building in Denver and destroyed \$175,000 worth of property.

An explosion of dynamite occurred yesterday at Pittsburg, several thousand pounds blowing up. Five persons were killed.

Senator Hansborough of North Dakota is preparing an amendment to the Wilson bill restoring the present bounty on sugar, and placing an ad valorem duty of six per cent. on refined sugar.

He thinks it will receive the support of all Republicans, Populists and the Louisiana Senators which would insure its carrying in the Senate by one vote.

At Chicago yesterday "Buff" Higgins was hanged for the murder of Peter McCoy last September. He exhibited most wonderful nerve.

At Buda Pesth, Hungary, since the death of Kossuth the students of the universities, together with mobs of citizens, have compelled all houses to be draped in mourning under penalty of destruction. The government was denounced for allowing Kossuth to die in exile.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative, effectively cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

GLADSTONE TO HIS CONSTITUENTS.

Recently Gladstone received an address from his constituents in Midlothian in which he was requested to continue to represent them in the House of Commons. Replying to the Grand Old Man says his chief desire is to follow the wishes of his constituents. He says there will naturally be a change in his attendance in Parliament, as he cannot yet tell how far his sight and hearing will disable him from performing his Parliamentary duties.

Reviewing his public life of sixty years, dating from Lord Derby's reform act, which he says was the political birth of Scotland, his career has been a history of political, economical, social, moral and intellectual emancipation and in all the numberless causes brought forward in his time Scotland has battled for the right.

He is deeply convinced that until the just demands of Ireland are satisfied, as the House of Commons tried to satisfy them, neither the legislative wants of any portion of the United Kingdom will be adequately met, nor will the Empire attain its maximum power, nor its honor be effectively cleared of the deepest historic stain ever attached to it.

THE FREE LIST.

The Wilson bill as amended by the Senate Committee and reported to the Senate taxes every article which is now dutiable, except the following: Borax crude or borate of soda, borate of lime, anthracite coal, old gunnybags, fl. only for re-manufacture, raw silk, or as reeled from the cocoon, but not doubled or twisted, silk cocoons, silk worms' eggs, quicksilver, wool, tin ore, timber, hewn and sawed, timber square or sided, sawed boards, planks, deals, clapboards, laths, shingles, pickets and staves.

A new assortment of picture moulding artist materials and studies just received by McCullough.

For rough or chapped skin use Mystic Balm 25 cents. Pinniger's, Virginia street.

Saved Her Life.

Mrs. C. J. Woolson, of Wortham, Texas, saved the life of her child by the use of Ayer's Cherry Pectoral. "One of my children had Croup. The case was attended by our physician, and was supposed to be well under control. One night I was startled by the child's hard breathing, and on going to it found it straining. It had nearly ceased to breathe. Realizing that the child's alarming condition could become possible in spite of the medicine given, I reasoned that such remedies would be of no avail. Having part of a bottle of Ayer's Cherry Pectoral in the house, I gave the child three doses, at short intervals, and anxiously waited results. From the moment the Pectoral was given, the child's breathing grew easier, and, in a short time, she was sleeping quietly and breathing naturally. The child is alive and well today, and I do not hesitate to say that Ayer's Cherry Pectoral saved her life."

AYER'S Cherry Pectoral
Prepared by Dr. J. C. Ayer & Co., Lowell, Mass.
Prompt to act, sure to cure

New York. Sold by all druggists.**BREVITIES.**

Ernest Voss went below last night. James Newlands was in town yesterday.

Ayer's Sarsaparilla is unequaled as a cure for female diseases.

Miss Kate Pendergast of Truckee is visiting friends in Reno.

Prof. Orvis Ring came down from the State Capital last evening.

James and John Aitken were passengers last night for California.

J. G. Platt of the Paragon Oil Company left last night for Napa, Cal.

John E. McKinnon of the Virginia Enterprise arrived in Reno last night.

Miss Dora Abrahams went to California last night to visit the Midwinter Fair.

Senator Jones is expected to arrive this morning on his way to Washington.

Frank Golden came down last night from Carson and went through to Nevada City.

One of Charley Stoddard's boys was thrown from a horse yesterday, breaking his arm.

Z. Keys of Susanville came in yesterday on the N. C. O. and left last evening for Boca.

Yesterday 21 cars of cattle and 19 cars of sheep were shipped from Reno to San Francisco.

J. F. Dennis of Battle Mountain came down from Carson last night where he has been on legal business.

O. H. Werren, the Virginia City merchant, came down last evening and continued on to California.

W. J. Westerfield returned yesterday from the Midwinter Fair. Mrs. Westerfield will return next Monday.

The winter term of the public schools closed yesterday and there will be a vacation until one week from Monday.

Mae Sample and wife came in yesterday from Susanville and will remain here about ten days visiting friends.

Frank H. Bangham and wife, nee Lillian True, came up from California yesterday morning and left for their home in Susanville.

T. R. Hofer, superintendent of the Carson Mint, came down from the Capital City last evening and continued on to San Francisco.

Miss Margaret McIntosh and Miss Frances Short of the public schools left last evening for the Midwinter Fair to remain a few days.

Miss Flora Northrup, Miss Nellie Rulison and Mrs. M. E. Doten of the public schools went below last night to visit the Midwinter Fair.

E. G. Cooke, advance agent of "A Railroad Ticket," is in town. The company will appear at the Opera House Saturday evening, March 31st.

The Lode says freight teams from Milford Pioche, a distance of 110 miles, have been sixteen days on the road. The storms have made the roads almost impassable.

Jacob Morgan, arrested for stealing a cow from S. T. Harrington and selling it at Verdi for \$24, waived examination and was held to answer before the Grand Jury.

Fine spring lamb at Dixon Brothers to-day, besides the choicest of all kinds of fresh beef, mutton, pork, sausage, etc., which they always have on hand for their patrons.

In the District Court yesterday Judge Cheney overruled the demurrer in the case of Evans vs. the N. C. O. Railroad Company, and defendant was given fifteen days to answer.

Ernest Hall, watchman at the Occidental mine, and a prominent musician on the Comstock, accompanied by his brother, Wm. Hall, came down on the V. & T. last evening and changed cars for the Midwinter Fair.

The storms which swept over Northern Texas, last Sunday are unparalleled in severity. Twenty persons were killed and over 100 were wounded. The town of Emery, the capital of Rain county, was almost totally demolished.

Judge A. C. Freeman of San Francisco came down from Carson last night and changed cars for his home. He is one of the most famous American lawyers, being the author of Freeman on Judgment and several other standard legal works which are found in every law library.

WEATHER DISTURBANCES—A Warm April Predicted.

Copyrighted 1894 by W. T. Foster.

St. Joseph, Mo., March 23.—My last bulletin gave forecasts of the storm wave to cross the continent from March 24th to 28th, and the next will reach the Pacific Coast about the 29th, cross the western mountains by close of the 30th, the great central valleys from the 31st to April 2d, and the Eastern States about the 3d. This will be a severe storm, and its course should be carefully watched as it crosses the continent. It will probably be at its greatest force in the Eastern States and Eastern Canada about April 3d and 4th, and at the same time the cool wave will be at its greatest force in Middle Canada and the Great Central valleys.

The second storm wave of April will reach the Pacific coast about April 3d, cross the western mountains by the close of the 4th, the Great Central valleys from the 5th to the 7th, and the Eastern States about the 8th. This will also be a severe storm, at its greatest force in the west of the Great Central valleys.

The latter part of March and the first half of April will be so crowded with weather disturbances that the regular storm waves will come somewhat irregular, fair weather days will be few and far between, and severe storms may strike on any day.

The warm waves will cross the western mountains about March 29th and April 3d, the Great Central valleys 31st and April 5th, and the Eastern States about April 2d and 7th.

The cool waves will cross the western mountains about April 1st and 6th, the Great Central valleys about the 3d and 8th, and the Eastern States about the 5th and 10th.

For April the whole temperature of the United States will average above, while at a few locations the temperature will be normal or below.

This will bring what is called an early spring in the extreme Northern States and Canada. The cold February brought a late spring in the South just as predicted in these bulletins.

Farm work will probably be retarded by rains during the first part of April, east of the Missouri and near the east of the lower Mississippi.

EARTHQUAKES AND COMETS.

Professor Falb of Vienna, Austria, is said to be a scientist of high repute. He is becoming world renowned for his correct forecasts of great earthquakes, and as weather events and earthquakes are believed to be from the same causes, Professor Falb's forecasts of the latter will be of interest to readers of these bulletins.

Some time ago he published predictions that earthquakes of more than ordinary force would occur during 1894 about January 21, February 20, March 21, April 6, May 5, August 1st and 30th, September 29th and October 28. These are also my dates for severe storms on this continent, and as his forecasts and my calculations were made without any knowledge of each other, it indicates that we are studying along the same lines as to the moon's influence on the earth.

According to Professor Falb's estimate, the greatest of these earthquake disturbances is to occur near August 20th, the next in force near September 29th, then February 20th, March 21st, April 1st, etc. This is in accord with my estimate of weather events. The storms about February 20th, were among the most severe of the winter, and the others are expected to develop force in accord with Professor Falb's estimate of earthquakes for the same dates.

He stops, however, at the points where the moon is nearest the earth, while weather calculations include many other positions of the moon and many more of the sun and planets. Electricity is the force that causes seismic and atmospheric disturbances, and when that force is rightly understood, we may know, approximately, when to expect important weather events and earth disturbances.

Professor Falb makes another important prediction. He says the great comet that visited our solar system in 1866 will return in 1899, and probably collide with our earth. No doubt such collisions have occurred and may occur again. All astronomers admit these to be indisputable facts.

A metropolitan daily paper of the Eastern States says: "Professor Falb has a reputation all over Europe for his meteorological knowledge and particularly for his extraordinary familiarity with the habits and customs of earthquakes. His predictions of seismic disturbances have been remarkably fulfilled."

These facts make his prediction about the comet of more than ordinary interest, and the unwelcome visitor may come uncomfortably near our earth, but there are many chances that no serious damage may be expected.

Astronomical calculations have advanced to most wonderful perfection, and astronomers can surely give almost the exact position of a comet at any moment. The comet of 1866 will no doubt cross the earth's path in 1899, but as our earth moves about 66,600 miles an hour, an error of one hour in the calculations would prevent a collision, and then probably nothing more serious could occur than the saturation of our atmosphere with poisonous gases from the comet, and a large increase of conflagrations, caused by an increase of electric activity.

Buckingham's dye for the whiskers does its work thoroughly, coloring a uniform brown or black, which, when dry, will neither rub, wash off, nor soil linen.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder
ABSOLUTELY PURE**MONEY AND VALUE.****Men Led Astray by Confounding Two Ideas.**

A piece of standard gold weighing twenty-five and eight-tenths grains is the money of the United States, which by law is declared to be of the value of one dollar.—Dr. Hogan.

The law does not say the value of the piece shall be one dollar, it says the name of it shall be one dollar and it leaves to commerce and the needs of business the regulation of its value.—R. L. Fulton.

The first of the above quotations is one of several illustrations used by Dr. Hogan in an argument to prove that money is not a measure of value; and, as I understood it, was not intended as a definition of money, and the second is Mr. Fulton's brief comments thereon. The quotations collectively remind me of the closing words of a famous poem by Saxe, "Each were partly in the right, and all were in the wrong."

The Doctor, I am sure, does not wish to be understood as saying that "a piece of standard gold weighing 25.8 grains is money of the United States," for the simple reason that it is not. When such a piece of metal is clothed with the impress of sovereignty it then, and not till then, becomes money, and a legal tender to the amount of one dollar.

True, as Mr. Fulton maintains, the law does not say in so many words "this piece of metal shall be one dollar," nor in so many words does the law say "the name of this piece of metal is one dollar," and yet, in effect, it says both, by stamping thereon the words "one dollar," coupled with the authority for so doing, to-wit: "United States of America."

Mr. Fulton, it seems to me, is led astray by the too common error of confounding two distinct ideas—the legal tender value of money and its purchasing power. Its creator, the law of the land, fixes definitely the legal tender or debt paying power of money; while commerce, the law of supply and demand, the needs of business and the number of dollars in actual circulation regulate its purchasing power. In neither event, however, in so far as the functions of money goes, has the commercial value of the substance upon which the impress of sovereignty is made anything to do with the debt-paying value or purchasing power of money.

T. V. JULIEN.

An Excellent Attraction.

The successful farce-comedy, "A Railroad Ticket," which has just closed a successful engagement at the California Theatre, San Francisco, is spoken of by the press of that city as a rattling, irresponsible bubble of fun, full of uproarious impossibilities. It will be presented here on next Saturday evening, March 31st. This play has scored the biggest kind of a hit wherever presented and will doubtless continue to do so, for the roster of the company is an excellent one. Arthur Moulton, James T. Kelley, Harry Porter, James Bevins, Rose Chesneau, Jeanette Bageard, Hattie Waters, and Anna Caldwell are all clever performers in their respective lines. The play is furnished with perfectly appropriate scenery, all their own, which they carry.

Nevada Exhibit.

The following contributions to the Nevada exhibit at the Midwinter Fair were received yesterday: Lovelock Commercial Co. \$100
Bank 250
F. W. Sharon, Palace Hotel, Cal. 150

Total \$500
The entire indebtedness of the Nevada building and exhibit has now been settled which about cleans up all the cash on hand.

Bucklen's Arnica Salve.

The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns and all skin eruptions, and positively cures piles or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25cts per box. For sale by S. J. Hodgkinson.

Prof. W. O. Pearce.

Organ registration and manipulation taught thoroughly. Organ tuning and repairing a specialty. Special attention given to beginners on the piano. Leave orders at C. J. Brookins' music store. sept6f

The Enterprise says that the rumor that the Comstock mines were to close April 1st is unfounded. The various companies operating on the Comstock lode are in as sound a condition financially as at any time since the incorporation. A majority of them having a balance of cash on hand ample for operating for several months without the necessity of levying assessments, and a glance at the delinquent list will show that in the most cases nineteen-twentieth of the amount levied is paid.

MR. FULTON'S FINANCIAL IDEAS.

He Thinks the Constitution says More Than It Does About Money.

EDITOR JOURNAL.—With your kind permission let me say that Congress is granted power by the constitution to regulate the value of our coins, but it is by putting more or less metal in them; not by changing the value of the metal itself by a statute. That would be to work a miracle, and even the Constitution of the United States would find that impossible. There were months of study devoted by the founders of the Republic to ascertain just how gold and silver compared in value and even then they did not get it right. They had to change the ratio between them three times.

There is no place in the law where it says the 412½ grain coin shall be of the value of a dollar. It says "That there shall be coined silver dollars of the weight of 412½ grains troy of standard silver," but it does not say what the dollar shall be worth. Every man who has a horse or a ton of hay to sell says how much it shall be worth to him, but the Government never does and never tries to.

The law makes the dollar of which the materials are worth but fifty-two cents, worth a dollar in other money by putting its credit into it, not by raising the value of the metal in it (which it cannot do), the same as you make a piece of paper, value one mill, worth ten or a hundred dollars by signing your name to a note written upon it, and not by raising the value of the paper itself, which is forever spoiled.

Truly yours,

R. L. FULTON.

The Storm Period.

The week ending March 11th inaugurated the five weeks' predicted period of severe storms and the reports are now all in. Three tornadoes occurred during that week, one in Colorado, one in Texas and one in Missouri, two of which were accompanied by severe hail storms. The center of the 7th to 11th storm wave entered the Pacific Coast on the morning of the 6th at which time the whole continent was covered by a low from which the tornadoes developed. On the 9th the wind reached the high velocity of 44 miles at Salt Lake and on the 10th 40 miles at Denver, Iowa, with the barometer down to 29.23. On the 11th the wind was 44 miles in eastern Canada. More than three inches of rain fell in parts of the country within twenty-four hours. The national weather bureau at Washington denominated this series of storms as "severe and moving with great velocity." The results are sufficient to verify the predictions for the inaugural week.

Three tornadoes occurred during that week, one in Colorado, one in Texas and one in Missouri, two of which were accompanied by severe hail storms. The center of the 7th to 11th storm wave entered the Pacific Coast on the morning of the 6th at which time the whole continent was covered by a low from which the tornadoes developed. On the 9th the wind reached the high velocity of 44 miles at Salt Lake and on the 10th 40 miles at Denver, Iowa, with the barometer down to 29.23. On the 11th the wind was 44 miles in eastern Canada. More than three inches of rain fell in parts of the country within twenty-four hours. The national weather bureau at Washington denominated this series of storms as "severe and moving with great velocity." The results are sufficient to verify the predictions for the inaugural week.

St. Joseph, Mo.

The week ending March 11th inaugurated the five weeks' predicted period of severe storms and the reports are now all in. Three tornadoes occurred during that week, one in Colorado, one in Texas and one in Missouri, two of which were accompanied by severe hail storms. The center of the 7th to 11th storm wave entered the Pacific Coast on the morning of the 6th at which time the whole continent was covered by a low from which the tornadoes developed. WEATHER AND MORALS.

An Intimate Connection Between the Two Noted by Scientist.

J. S. Lemon notices the very great influence of weather on the health and temperament, and through them on the customs and habits of men in all ages. This is reflected in the salutations of all nations. In their religious ideas, particularly in their conceptions of the future life and a thousand petty details of everyday existence. It affects even crime. Suicide is known to depend largely upon the weather, and it has been calculated that in India 48 per cent of certain crimes disappear when hot weather gives place to cold.

A London correspondent says: When
Cardinal Manning was dying three
years ago, he spoke few words for
posterity into a phonograph which was
kept carefully preserved till the other
day by Cardinal Vaughan. A small
company of distinguished persons, in-
cluding Ambassador Bayard, met on
the invitation of the cardinal at the
archbishop's residence to listen to this
revel of a voice that is still. The voice
was very distinct and clear. There were
long pauses between the words. The
message was not in itself of great im-
port beyond showing the predominant
thought in the mind of a man just be-
fore death. It follows:

To All Who May Come After Me:
I hope that no word of mine written or spoken
in my life will be found to have done harm
to any one after I am dead.

HENRY EDWARD MANNING,
Cardinal Bishop.

A Chance For American Inventors.

The Netherlands Society For the Pro-
motion of Industry desires to receive
papers containing an indication of the
means to obtain energy through wind-
mills, to accumulate this energy electrically,
and to transport it or to make it
transportable. The drawings belonging to
the answers must be made on white
paper—no blue prints—on a scale of
one-quarter. The prize offered is the
gold medal of the society and a reward
of \$30. Answers must be sent before
July 1, with the author's name, in a
closed envelope to the general secretary
of the society, F. W. Eeden, at Haar-
lem, Holland.

BALD HEADS!

What is the condition of yours? Is your hair dry,
harsh, brittle? Does it split at the ends? Has it a
lifeless appearance? Does it fall out when combed or
brushed? Is it full of dandruff? Do.s your scalp itch?
Is it dry or in a heated condition? If these are some of
your symptoms be warned in time or you will become bald.

Skookum Root Hair Grower

is what you need. Its production is not an accident, but the result of scientific
research. Knowledge of the diseases of the hair and scalp led to the discov-
ery of how to treat them. "Skookum" contains neither mineral nor oil. It
is not a dye, but a delightfully cooling and refreshing Tonic. By stimulating
the follicles, it stops falling hair, cures dandruff and grows hair on bald
heads.

Keep the scalp clean, healthy, and free from irritating eruptions by
the use of Skookum Skin Soap. It destroys parasitic insects, which feed on
and destroy the hair.

If your druggist cannot supply you send direct to us, and we will forward
prepaid, on receipt of price. Grower, \$1.00 per bottle; 5 for \$5.00. Soap, 50c.
per jar, 6 for \$3.50.

THE SKOOKUM ROOT HAIR GROWER CO.,
57 South Fifth Avenue, New York, Y. Y.

Pumice Stone.

Pumice stone is a porous feldspathic
scoria from volcanoes. The pores are
linear and so fine as often to be barely
visible except by means of a magnifying
glass. Its specific gravity is 2.2 to 2.4
—water being the unit—but by reason of
its spongy texture pieces are often
buoyant enough to float on water. It
consists chiefly of silica, with some-
times 17 per cent of lime, 6 per cent
of soda and 4 per cent of potash. It is
of grayish shades of color, passing into
yellow and brown. The chief source
from which it is obtained for commer-
cial purposes is Campo Bianco, one of
the Lipari islands, where it forms a hill
nearly 1,000 feet high. In the arts
pumice is largely employed, mostly in
a pulverized state, as a polishing mate-
rial for ivory, wood, glass, marbles, etc.
It is also used in lump for grinding and
smoothing metallic surfaces, leather,
etc., and in the preparation of parch-
ments, etc. Quantities of the pulver-
ized pumice are used in making fancy
soaps.—Brooklyn Eagle.

West Virginia.

West Virginia, with less than 800,-
000 inhabitants, has but three cities
and is essentially a rural and half set-
tled region. In spite of her enormous
wealth in timber and mines also, many
of her counties number only a handful
of people. No West Virginia county
has 50,000 inhabitants, and only 10 have
more than 20,000, while 10 have less
than 10,000 and two less than 5,000.
In many of the mountainous counties
the conditions of life are simple to the
last degree, and the people are far re-
moved from the great currents of na-
tional life in so far as well as in distance
and time.—New York Sun.

TESTIMONIALS published in
behalf of Hood's Sarsaparilla are
as reliable and worthy of confidence as
if from your most trusted neighbor.

His Trip to Japan.

The rector of one of the up town
churches announced in Sunday school
that all the boys who were faithful at-
tendants at the classes for a specified
time should be taken on a stereopticon
trip to Japan.

Time passed, and the period was fin-
ished. But before the promised enter-
tainment could be announced there was
a ring at the rectory door one day, and
a good woman appeared inquiring for
the preacher. He was out, and she was
told she must come again.

She was willing, adding that she
wanted to see him about her boy's go-
ing to Japan. He had won the trip, she
said, but she didn't know what clothes
he would need or what preparations she
might have to make.

It is to be feared, though it is not so
stated, that the rector was out the next
time she called too.—New York Times.

A Whist Curiosity.

Those who are fond of a "hand at
whist" will be interested in the follow-
ing peculiar circumstance: One even-
ing four friends were playing a rubber
at a mutual friend's house not far from
Barnstable. O. D. and R. B. were part-
ners, and E. B. and C. H. were ditto.
On two occasions E. B. and C. H. won
every table, and on one occasion O. D.<
